

## Be the boss of your parts inventory

### The John Deere Dealer Customer Portal

It's not just about ordering parts. Or finding parts. Or knowing how many parts you currently have. It's about all of that and so much more. The Dealer Customer Portal (DCP) is where you can manage the parts you have. And the parts you need.

# Take a look at how the Dealer Customer Portal (DCP) can transform the way you manage your parts inventory:

## What is the DCP?

The DCP is a web-based parts management and inventory tool that can be utilized with a smart phone, tablet or computer. It is used for ordering parts, maintaining parts inventory and ordering a restock of parts or additional parts.

## Ordering Parts through DCP

Obviously, ordering parts is the number one function of the DCP. You can search for parts by part number, description, or parts catalog lookup, view your inventory, place & pay for orders 24/7/365.

## Pay Invoices Online

Eliminate paperwork and traditional mail. View your account balance online, search for and print invoices, and pay off any unpaid invoices via bank account or credit card.

## View Transaction History

You can view, search and sort your entire transaction history for all equipment accounts, using one login and from any device.

## See your Equipment Inventory

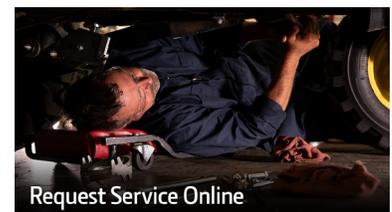

You can also add, modify or remove any pieces of equipment currently on record with us. You can also browse our used equipment for sale directly from Machine Finder, the John Deere website for used equipment.

## View Rental Contracts

You can also view, search and sort any open or closed rental contracts you have with us as well.

## Request Service

You can even make a request for service anytime, 24/7/365, so that we can call and schedule service with you

**That's the Dealer Customer Portal: the one place where you can be in total command of your parts inventory. Take control of your parts business today!**
