

WINTER EQUIPMENT INSPECTIONS

**Protect your investment.
Protect your productivity.**

Available through January 31, 2022

With our service packages, your equipment will be ready to run when planting and harvesting season arrives. Our John Deere factory-trained service professionals will come to your farm and give your equipment a complete inspection. Schedule your appointment today!

If repair work is needed, all minor work will be completed on-site. We will pick up and haul at 50% off hauling charges, if inspection repairs need to be made in one of our shops.

Combine Inspection > \$449*

- Check operator station functions
- Check spike teeth
- Check concaves
- Check augers
- Check chains
- Check gear cases
- Check electrical components
- Check rotor components for wear
- Inspect filters
- Check rasp bars
- Check all bolts and chains and adjust back to spec
- Check engine system, idle and for leaks
- Check fuel system for leaks
- Check hydraulic system operations and for leaks
- Check belt alignment and wear damage
- Check water pump endplay or weep hole for leaks
- Check sieve and chaffer (cracks)
- Magnetic clutch operation
- Check straw chopper or spreader operation
- Feeder house speed and wear check
- Separator wear check
- Pull all oil and fluid samples for laboratory testing

* Inquire with Service Manager for further details. Written quote is provided on all necessary repairs No Interest until November 15, 2022 through John Deere Financial. Available only for qualifying John

Cotton Picker Inspection > \$449*

- Check operator station functions
- Inspect picking units
- Check belts
- Check hydraulic system
- Check augers
- Check chains
- Check gear cases
- Check electrical components
- Inspect filters
- Complete machine operational check
- Check moisture system
- Check doffers
- Check hydraulic system operations and leaks
- Check engine system, idle and for leaks
- Check fuel system for leaks
- Inspect each gear drive box drain plug for metal shavings
- Check water pump endplay or weep hole for leakage
- Check belt alignment and wear damage
- Pull all oil and fluid samples for laboratory testing

before any work is performed. Repairs totaling over \$1,000 or more may qualify for No Payment Deere Multi-Use Account holders. Must request no payment, no interest option before completion.

Tractor Inspection

4X20, 4X30, 4X40, & all 5000 Series > \$299*
 6R, 6000, 7R, 7000, 8R, 8000, 9R & 9000 Series > \$349*

- Check functionality of brakes
- Check all lights
- Check air filters
- Check main hydraulic pump pressure
- Check battery cables
- Check all oil levels
- Check belts and hoses
- Check hydraulic pump drive
- Check transmission PSI
- Check front end and steering components
- Check transmission operating pressure
- Check exhaust system
- Pull all oil and fluid samples for laboratory testing
- Check for diagnostic codes
- Check unit for leaks

* Inquire with Service Manager for further details. Written quote is provided on all necessary repairs No Interest until November 15, 2022 through John Deere Financial. Available only for qualifying John option before completion.

Sprayer Inspection > \$449*

- Check complete electrical system
- Check engine
- Check cooling system
- Check fuel system
- Check hydraulics and hydrostatic system
- Check operator station
- Check boom-values, cylinders and switches
- Check solution system
- Check foam marker system
- Check spray star system
- Inspect chassis
- Check AMS components
- Pull all oil and fluid samples for laboratory testing

Planter Inspection > \$20/row*

- Inspect main frame
- Inspect hydraulic system
- Inspect row unit parallel linkage and mounting brackets
- Inspect row unit frame
- Inspect seed and measure seed openers
- Inspect opener scrapers and setting
- Inspect gauge wheels and setting
- Inspect closing system
- Inspect vacuum system and air delivery systems
- Seed meters tested for additional charge

DON'T FORGET to have your planter seed meters tested for accuracy! Save \$100s in seed cost and potentially increase yields by \$1,000s through annual meter testing!

before any work is performed. Repairs totaling over \$1,000 or more may qualify for No Payment Deere Multi-Use Account holders. Must request no payment, no interest

INSPECT. PROTECT. SAVE!

The Benefits of OILSCAN™ and COOLSCAN™

- Reduced ownership costs and operating costs while improving equipment reliability
- Increased machine life by detecting problems early
- Recommended minor repairs can correct potential costly failures
- Support warranty by documenting service performed and verifying equipment condition
- Improved productivity by reducing non-scheduled downtime
- Determine levels of antifreeze and supplemental additives in the cooling system to ensure proper engine protection
- Ensure top value for equipment at sale or trade-in by providing comprehensive maintenance records
- Track normal wear trends of fluid components to detect failures before they occur

Guaranteed 4-hour response time for 12 months on units repaired during inspection.

All recommended repairs must be performed to qualify for priority 4-hr. response.

1-Year Parts and Labor Warranty on ALL repairs performed by Quality Equipment on John Deere Ag & CCE equipment.
(6 months on repairs made on John Deere turf equipment.)

Periodic Maintenance Specials

ENGINE UNDERHAUL > \$2,299**

Protect your engine by taking advantage of our engine underhaul specials. Our complete John Deere underhaul package includes:

- Replacing all rod and main bearings
- Replacing all rod bolts
- Changing oil & oil filter
- 1-year warranty on all parts & labor

**Eligible models include older 20, 30, 40, 50, 55 & 60 series tractors. Quotes available upon request for 7000 & 8000 series tractors.

MFWD SEAL REPLACEMENT > \$599 per side***

Special pricing for a limited time. Seals replaced in both front hubs.

*** Seals and labor to install seals included. Additional parts or labor may be required to fully repair, if internal component damage is found. Quote for additional repairs will be provided, if necessary.

FUEL INJECTION SYSTEM FLUSH > \$499

Price includes John Deere-recommended flush process for HPCR systems, a set of John Deere fuel filters and one gallon of PROTEC Bulk Conditioner (treats up to 1,280 gallons).

Flush completed without injector removal from engine.

Proper maintenance means:

- Removing harmful deposits
- Improved injector performance
- Improved emissions
- Improved fuel efficiency

VARI-COOL FAN DRIVE SERVICE

Tractors > \$199

Sprayers > \$199

Combines > \$299

Cotton Pickers > \$449

Extend the life of your vari-cool fan drive by letting a Quality Equipment factory-trained technician inspect and service the unit.

We will service the fan drive with synthetic grease and change the fan belt on your unit to ensure maximum efficiency from the fan drive. This is a recommended service that can save you hundreds of dollars and prevent expensive downtime.

Compact Construction Equipment Inspections

Compact Track Loaders > \$249*

Skid Steers Loaders > \$249*

Mini Excavators > \$249*

- Check all lights
- Check air filters
- Check battery cables
- Check all oil levels
- Check belts and hoses
- Check transmission operating pressure
- Check exhaust system
- Pull all oil and fluid samples for laboratory testing
- Check for diagnostic codes
- Check unit for leaks
- Check all electrical components
- Check all hydraulic hoses
- Check boom pivots & pins
- Check quik tach pins & bushings
- Check axles and bearings
- Check track condition and tension
- Check rollers-idlers-sprockets
- Check hydrostatic system & pressures

\$119 IMPLEMENT INSPECTIONS

(Offer excludes planters. See planter inspections on pg. 4. Not all eligible implements pictured.)

Customer Testimonials

See what other customers said about our winter inspection program.

“We had our 9870STS combine inspected as part of the Quality Equipment winter equipment inspection program last year. Our combine was running okay when we finished our soybean harvest, but the coolant sample came back that we had water in the oil. Upon teardown, the technician found that we had a crack in the #1 liner. Luckily for us, the combine was still covered under our Powergard warranty that would have expired in May before we went back to the field. The issue could have been much worse if we had waited until wheat harvest, so the downtime we avoided by having the combine fully inspected with the complete fluid sample plus the potential out-of-warranty repair expense was well worth the investment. That one inspection saved us thousands of dollars!”

“Quality Equipment inspected our 7630 tractor as part of their winter inspection program. During the inspection, complete fluid samples were pulled and sent to a lab for analysis. The oil sample came back with fuel in the oil, so it was determined that they caught a fuel injection pump leak in the early stages, which saved us a lot of money and costly downtime. A \$4,000 repair could have easily turned into a \$20,000 engine replacement, if the tractor had continued to run leaking fuel into the crankcase. We now have all of our tractors and our combine inspected every year to help us avoid more costly repairs and to keep us running. It is well worth the cost!”

“Quality Equipment inspected our 9770STS combine last year during their winter inspection program, and the technician found a burnt rotor bearing cover and burnt grease line as a result of a rotor bearing failure. We chose to let Quality Equipment repair all of the suggested items on the repair quote which cost us about \$12,000, but that cost was much less than replacing the combine, had the unit caught on fire during corn harvest due to the failed bearing. We saved thousands of dollars, not to mention avoided costly downtime as a result of the findings during the inspection. We are sold on the value of letting Quality Equipment inspect our equipment every year now.”
